**1**
- Scans drivers with SCANNER
- Scanner sends access request to Resident

GUARD HOUSE

DELIVERY

### RESIDENT grants/denies access
**2**
- Resident receives request on his/ her VISIT ME APP
- Resident can Accept or Deny

UNIT 16
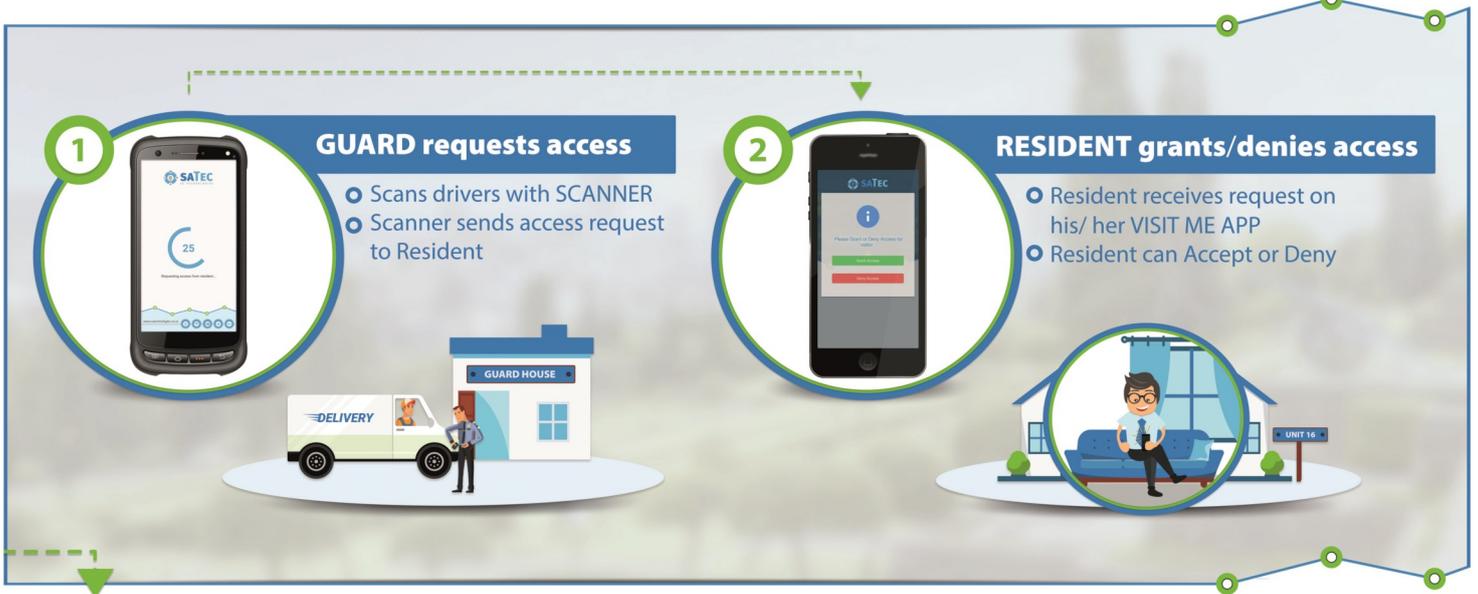

## No more call costs with our VisitMe SmartApp

**VISITOR MANAGEMENT SYSTEM**

GET IT ON Google Play | Available on the App Store

**USER-FRIENDLY**
Our SmartApp has been designed to ensure that any user with a smart phone would be able to pre-clear a visitor and forward the booking code using WhatsApp, SMS or Email.

**SMARTAPP - PRE-BOOKING AND UNEXPECTED VISITOR AUTHORIZATION**
No more intercoms! With the VisitMe SmartApp, the Operator can interact directly with the resident to allow or deny access to an unexpected visitor.

**ACCURATE VEHICLE AND VISITOR IDENTIFICATION**
Our scanners have been designed to offer a user-friendly interface to ensure the operators quickly and efficiently process visitors.

**PAPERLESS VISITOR TRANSACTIONS**
Going green has never been so cost effective, with the new SmartApp there is no need for printers or guarding books. All records are stored electronically and booking codes can be sent to the visitor's phones using WhatsApp.

**DETAILED VISITOR REPORTING**
Customised reporting and a statistical dashboard makes analysing your visitor data a breeze. Entry and exit scans gives you access to "visitors on site" reports. This is valuable when you want to determine who has not yet left the premises at a certain point during the day.

**VISITOR VALIDATION ON EXIT**
Onsite validation ensures that driver and vehicle information matches on exit. Any discrepancy would result in an alarm on the scanner which the operator would have to acknowledge before he can proceed to allow the visitor out.

**FLAG BANNED VISITORS**
Any suspicious vehicle's number plate or person's ID number can be flagged on the system. The operator would be made aware of a flag with a customised message on the scanner instructing the appropriate response to follow in that situation.

**REPAIR COSTS INCLUDED IN SLA**
Repair costs for broken scanners have been included in our new service level agreement and now also includes accidental breakages. Terms and Conditions apply.

**POPIA COMPLIANT**
SATEC is fully compliant with all the requirements as set out in the POPIA Legislation.

**LOW OPERATIONG COSTS**
With low call costs and no intercom charges, VisitMe ensures the lowest operating cost of any Visitor Management System available.

## The VisitMe Visitor Management System truly defines world class technology, through its first to market functionality!
